AV RIDER

Computer, Projectors, and Displays

Sharmin provides her own Apple MacBook Pro 14" running macOS Monterey v 12.2.1.

• Video

Sharmin has a direct HDMI port, and her entire presentation is presented from her computer using a 16:9 display ratio at 3840 by 2160.

• Slide Advancer

The client must provide a DSAN Perfect Cue system (or equivalent) for Sharmin's direct slide control, which connects to her laptop via a USB or USB-C port.

• Audio

Sharmin can use the standard 3.5mm analog headphone jack, USB-C ports, or HDMI, whichever you prefer. Please note that an audio connection is required.

• Computer Location

Sharmin does not need the computer on stage with her. In fact, she prefers the computer to be placed with the AV crew so it doesn't clutter up the stage.

• Microphone

Sharmin requires a wireless lavalier or "countryman" microphone connected to a professional audio system.

• No Podium

Sharmin prefers no podium on stage. If one must be present, it must be pushed back so she may walk in front of it unencumbered.

• AV Testing / Soundcheck

Sharmin requires an A/V check no fewer than 30 minutes before taking the stage.

• No Internet Access

Sharmin presents using her own laptop with all videos, audio, and content embedded in the presentation. Therefore, no internet access is necessary.

• Confidence Monitors

Sharmin strongly prefers at least one confidence monitor, if possible.

• Beverage

Please have a bottle of water available to Sharmin while on stage.
